Hiring Manager
Les Mills International
[Company Address]
Auckland, New Zealand

Dear Hiring Manager,

I am excited to apply for the Analytics Engineer position at Les Mills International. As a Senior Data Engineer with a strong background in data modeling, analytics, and process optimization, I bring the technical expertise and passion for actionable insights that align perfectly with your mission to create a fitter planet.

In my current role at Wells Fargo, I have spearheaded initiatives to transform raw data into meaningful insights by:

Developing and optimizing ETL pipelines using Python and SQL, ensuring data integrity and accessibility for analytics and reporting.

Implementing scalable data models using best practices to support machine learning workflows and decision-making processes.

Collaborating across teams to design dashboards and reporting layers that drive business strategy.

I am proficient in dbt, SQL, Git, and Python, with experience in tools like Power BI for data visualization. I also have hands-on experience with Snowflake, optimizing data pipelines for scalability and performance, which complements your preferred skills.

What excites me most about this role is the opportunity to be part of a company with a global impact and a mission-driven culture. Les Mills' dedication to innovation and inclusivity resonates deeply with my own values. I thrive in collaborative environments, and I'm eager to bring my problem-solving mindset and technical skills to support LMI's growth and the development of its analytics capabilities.

Beyond my technical experience, I bring a strong focus on continuous improvement and stakeholder engagement, ensuring that analytics solutions meet both immediate needs and long-term goals.

Joining Les Mills International would be an incredible opportunity to merge my passion for data-driven innovation with your mission to inspire a fitter, healthier world. I would be delighted to discuss how my experience and skills align with the goals of your team.

Thank you for considering my application. I look forward to the opportunity to contribute to your vision.

Warm regards,
Jesse McIntosh
